Armstrong Rhinofloor: the new standard of tough.

Soft underfoot it may be, but there's an underlying toughness that sets a new standard of durability in this category of flooring.

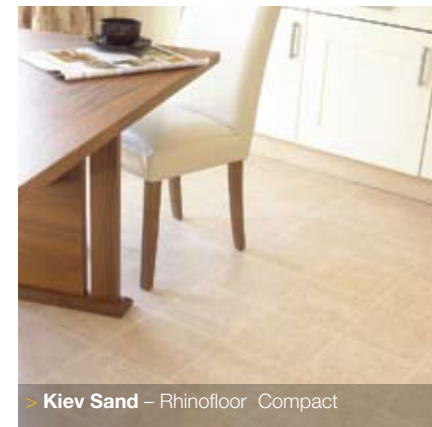

Whilst all cushioned floors are made up of layers, the Armstrong Rhinofloor range has the additional protection of the unique Armstrong Rhinoguard coating. It's this unique additional layer that ensures Rhinofloors are more durable, easier to clean and easier to live with.

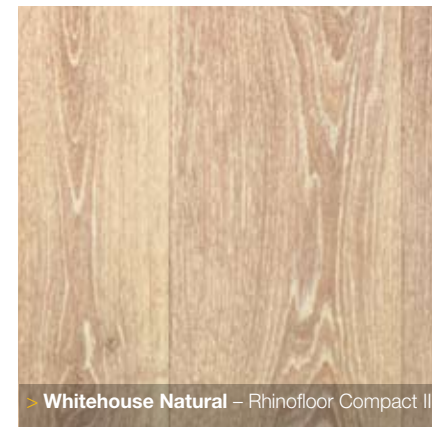

- 1** Rhinogrip improved textured surface, resists dirt and stains plus a lower potential to slip when wet
- 2** Rhinofloor 0.35mm wear layer for exceptional durability
- 3** Rhinofloor print layer shows off the multi-award-winning Rhinofloor designs
- 4** Rhinoflex glass fibre web for optimum strength and stability
- 5** Rhinoflex backcoat with a new formulation for increased resilience and comfort
